TPM Top-of-Pole Mounts

Standard TPM mounts have heavy steel mounting sleeves, elevation pivots and strongbacks that are painted with a durable outdoor paint. The module rails are 6061-T6 mill-finish structural aluminum angle. For harsh environments there are two finish options available: either powder-coated steel with mill-finish aluminum module rails (add 35% to prices shown) or hot-dip-galvanized steel with clear anodized aluminum rails (add 80% to prices shown). Stainless steel module mounting hardware is provided. Standard top-of-pole mounts are adjustable from 15 degrees to 65 degrees in 10-degree increments. These racks are made to mount on standard sizes of SCH40 steel pipe. **The number after the price is the series number.** The series number refers to the actual rack design (see DP&W Top-of-Pole Mount literature) – it is the maximum module area allowable for the design followed by the nominal mounting pipe size.

SPM Side-of-Pole Mounts

Standard SPM mounts are mill-finish aluminum (-MA). Stainless steel module mounting hardware is provided with all racks. For anodized aluminum (-AA) racks add 30% to the MA prices. Stainless steel band clamps are provided with each mount for attachment to poles. Most models can also be attached to flat vertical surfaces using installer-supplied lag bolts or through bolts. U-bolts are available on request.

RVM RV Mounts

RVM mounts are available in both tilt-up (-ADJ) and flush-mount (-FM) versions. The adjustable models tilt left or right 45-degrees and lock flat for travel. They are made of mill-finish aluminum extrusions and use brass thumb screws and stainless steel threaded inserts. The design allows mounting on curved surfaces. These mounts can also be used on walls. The flush mounts are made of 1"x1"x1" z-shaped aluminum.
